THE HYPERVERSE ENVIRONMENT

ABOUT HYPERVERSE

What is Hyperversion

Hyperversion has constructed a DeFi ecosystem that will provide a completely decentralized financial infrastructure for all digital currency users. Hyperversion will devote itself to developing quality blockchain projects, lead the strategic direction of Fintech, and aims to make more contributions to the blockchain industry.

HyperTech Group has launched the Hyperversion – Ogilvy Plan to build a DeFi (Decentralized Finance) ecosystem. The aim is to provide a holistic decentralized financial infrastructure. Ryan Xu, also known as the Martian, is the Chief Consultant of HyperTech Group, and will be heavily involved in the project.

DeFi (Decentralized Finance)

Decentralized finance is an open source technology that reaches disintermediation through decentralized layers and the elimination of centralized intermediaries in order to improve the current financial system in all aspects, emphasizing the core tenets of openness, fairness and connectivity. Take cross-border payment as an example, when a person remit money to a person in another country, they usually need to find a financial institution to complete the payment task, but it will charge a certain fee in return. However, DeFi (Decentralized Finance) app disintermediates the entire remittance process by sending digital money directly from his/ her wallet to the payee without the need for a financial institution intermediary service. DeFi has many different financial applications, including payments, debit and credit, stable coin, tokenisation and decentralized exchanges, and can create a new generation of financial system.

SCOPE OF WORK

The services

Through the acquisition of a HyperDrive membership you shall be granted a revocable, limited, non-exclusive, non-transferable, and non-sublicensable license to access the services rendered by Hyperverse.

If you comply to the terms you shall receive credits (hereinafter known as “HU”) from Hyperverse on a periodic basis, which will enable you to redeem specified cryptocurrency tokens through the Hyperverse platform.

Hyperverse will also provide educational resources such as text, graphics, photos, audio files, and documents for you. The educational resources provided shall be subjected to availability, and shall mainly focus on cryptocurrency terminologies and concepts.

Terms of service

You shall establish a budget, acquire cryptocurrency, and transfer the said cryptocurrency to Hyperverse via the use of their app, web service or other mechanisms as made available by Hyperverse.

Hyperverse shall provide the platform with which to perform operations pertaining to cryptocurrency activities as well as make available the educational and instructional content for you to understand and execute operations as required to accomplish Hyperverse's aims from the cryptocurrency markets.

Hyperverse shall take the budgeted cryptocurrency received by you and, via liquidity management activities across multiple exchanges, generate revenue for you in the amount of HU from 1.5X to 3X, depending on the membership package you purchased and the cryptocurrency amount transferred by you to Hyperverse.

HOW DOES THE REWARD SYSTEM WORK

Once you become a member of Hypiverse (see *invitation on slide “How do I become a member”*) you will be able to acquire any of the three available memberships: 300, 500 or 1000 HU (refer to slide *“How to acquire a membership”*).

Once you acquire your membership, Hypiverse will multiply by 3 your initial membership value, hence: 300 HU will turn into 900 HU; 500 HU into 1500 HU; and 1000 HU into 3000 HU.

Starting from that date Hypiverse will reward you with 0.5% of your membership (300, 500 or 1000 HU) every 24 hours. For example, a 1000 HU membership will return a daily reward of 5 HU. This amount is subtracted from your cumulative membership, now 2995 HU.

After 10 days (assuming a 1000 HU membership) you will have 50 HU of rewards which you can then use to rebuy an additional membership or withdraw to your personal account.

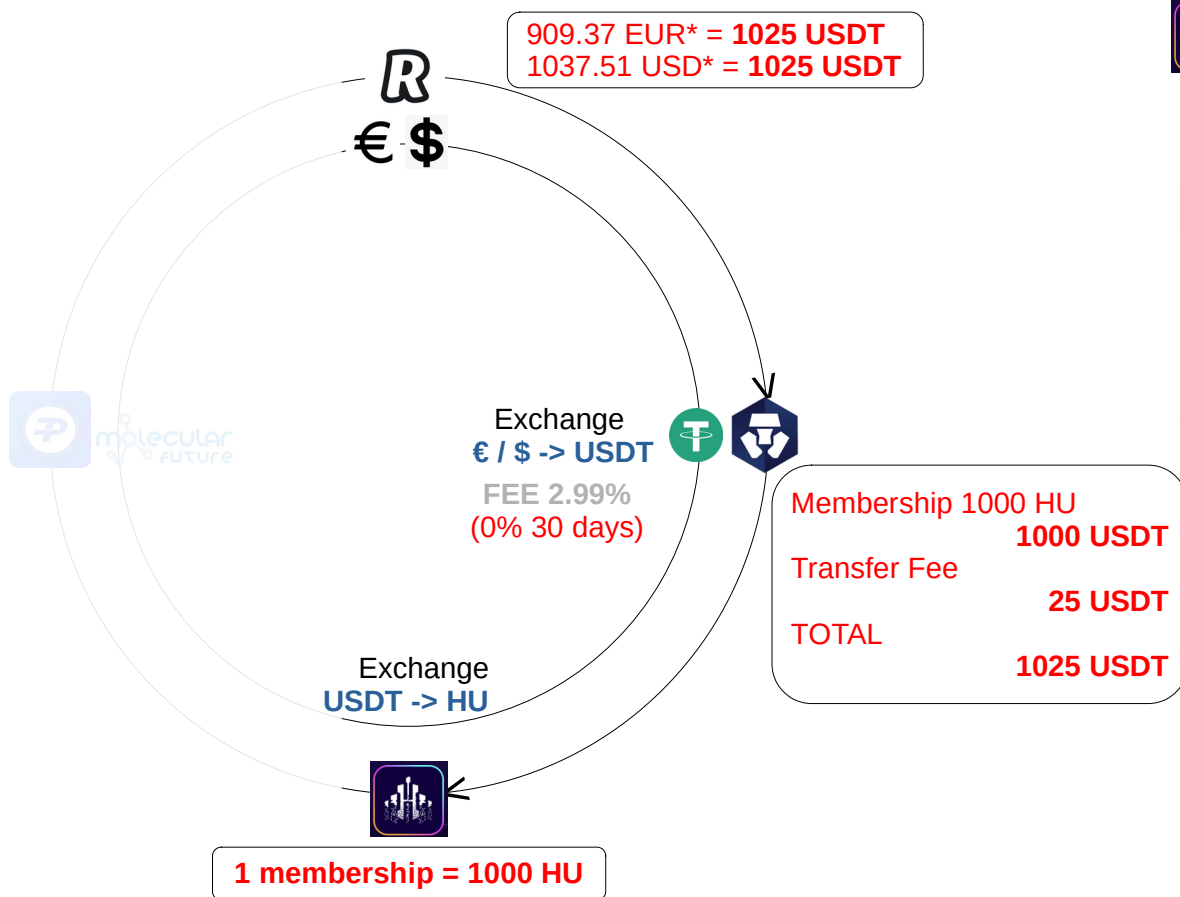

If you rebuy, your 50 HU will turn into 150 HU, increasing your cumulative membership (2950 + 150 = 3100 HU on day 10) and the rate at which you get your daily rewards from that day onwards (5.25 HU/day).

If you do not rebuy, you will have your 900, 1500 or 3000 HU ready to withdraw after 600 days.

HOW MUCH DOES A MEMBERSHIP COST IN FIAT CURRENCY

Hyperville has memberships of 300, 500 and 1000 HU
Since 1 HU = 1 USDT, the membership will cost you 300, 500 or 1000 USDT

During the first 30 days there is no fee added to your transactions but a price increase of 1,22 % (**1037.51 \$**) is added to USD and a price increase of 1,52 % (**909.37 €**) is added to EUR. Additionally a 25 USDT transfer fee is added to each transaction. Hence, a membership of 1000 HU will cost you **1025 USDT**

Make sure you have enough funds in your account
Confirm the amount that Crypto is going to charge to your card before making the payment

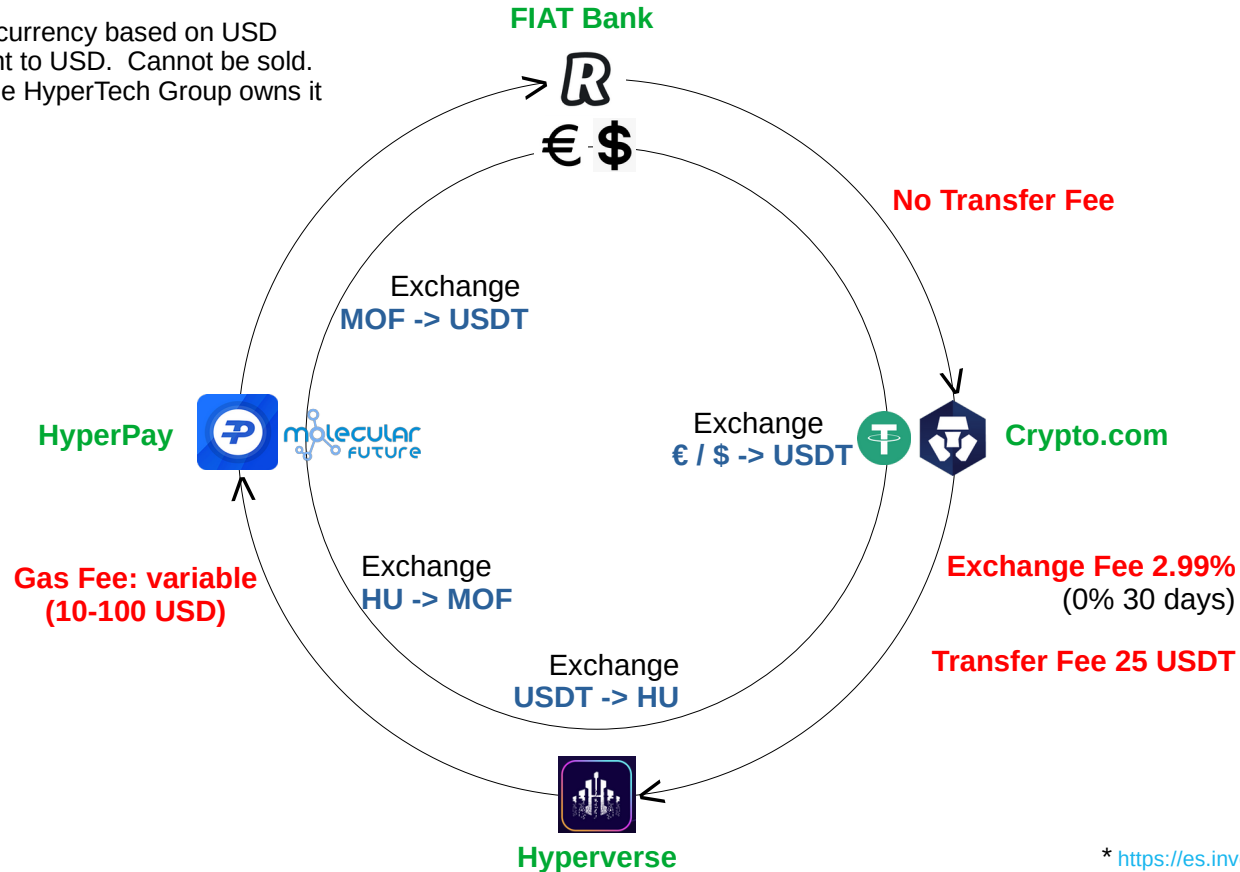

A **1000 HU** membership costs approximately **1038 \$** or **910 €**
